Empower More Members to Ride Inside

Myride V3 invites users to recreate the indoor cycling experience or ride the world's terrain with the touch of a button. This allows members to ride when they're ready and also gives non-cyclists the ability to try indoor cycling in a non-intimidating environment.

Why MYRIDE?

Myride V3 offers a new era in indoor cycling. For the first time ever, the benefits and emotions of indoor cycling are simulated and experienced in a personalized on-screen workout where users can build their own workout or choose a preset challenge to achieve their goals. Myride can be installed as an in-studio and/or gym floor solution. The console's unique nature provides versatile installation solutions that no other product can match.

Benefits

- Transport users all over the world with stunning terrain
- Over one million workout variations to keep members motivated
- Free-standing console allows for placement flexibility - on the floor or in the studio
- Ability to offer indoor cycling without a studio
- Multilingual - reach English, Spanish and German speaking participants
- LAN access allows for seamless software updates and remote servicing

*bike not included
