

Myride+ is a complete software and content remap of a Myride console. The new product allows you to connect your Myride+ console to any TV screen(s) or projector via HDMI and send audio to your sound system via stereo leads. Myride+ is suitable for group indoor cycling in the studio or on the gym floor.

The Myride+ console relies principally on sending its visual content to a third party screen via HDMI and its stereo audio out (3.5 mm).

Myride®+ does more. And even more.

Compelling virtual coaching in classes that run 100% on their own on the hour, every hour, every day. Now that sounds like more. Myride®+ meets your need to maximize every inch of space and every dollar spent on equipment when investing in your club and your members' fitness experience.

- Improve sales, retention and member fitness by offering the world's most advanced group indoor cycling experience
- Offer prospective and current members a more flexible indoor cycling timetable with instructor-led and virtually coached classes
- Attract the best cycling instructors in town – and their clients – by building an incomparable group cycling system for them to use
- Maintain your members' motivation with over 140 world destinations and pre-designed world tour challenges and expeditions
- Receive updated support for instructor-led and virtually coached workouts
- Receive remote servicing support and software updates via LAN connectivity
- Reach English, Spanish and German speaking participants
